SUMMARY

Hello I'm Austin Torres, and I'm a Front-End Web Developer. I'm always looking for new ways to improve my skills, and create the most user-friendly and efficient solutions to problems. I'm looking for a company that can enhance my abilities as a Front-End Developer, and work as a team with fellow developers.

SKILLS & TOOLS

- HTML5
- CSS3
- JavaScript
- Bootstrap 4
- ReactJS
- Figma
- Git/GitHub
- NPM
- API-Connectivity
- CRUD
- SEO
- Accessibility
- Local Storage

PROJECTS (All Projects)

XFinity Clone (austintorresfrontend.com/mockxfinity.html)

- The Xfinity Clone project was created to demonstrate my ability to take a design and translate it into code. I made it as close as possible to the original site at the time.
- The project was built with HTML5, CSS3, and vanilla Javascript

Perfect Lighthouse (austintorresfrontend.com/perfectproject.html)

- The Perfect Lighthouse project was created to learn how and obtain a Perfect Google Lighthouse Score. This project alone taught me alot about SEO, Accessibility and Performance.

- This Project was built with HTML5, CSS3, Vanilla Javascript, and Bootstrap5. I also used Figma to create the design before I translated it into code

Game Database (poetic-rabanadas-1d8116.netlify.app)

- The Game Database project was created for my own use but also to test out using an API in React. The web app allows you to search for games sorted by game console and game genre and it's listed using Metacritics game score to show the best games first. You can also search up a specific game or game series by typing in the name and also click on the game to view more details and use Local Storage to remember the last searches that were made.
- This project was built with HTML5, CSS3, Vanilla Javascript and ReactJS

Personal Game Blog (https://www.couchpotatogamereviews.com/)

- This project is a personal gaming blog I created to write my thoughts on video games I played while also teaching myself how to use ReactJS. This project taught me how to use Routes, Props and State effectively
- This project was built with HTML5, CSS3, Vanilla Javascript and ReactJS

WORK EXPERIENCE

-Cashier, Whole Foods Market, July 2018-Current

Vauxhall, NJ

At Whole Foods Market I had many responsibilities outside of being a Cashier, I worked the role as a Cashier Assistant, Bakery Associate, Holiday Runner, and Coffee Bar Associate.
All of these different positions were given to me because of how reliable of an employee I was, but as a Cashier I was mainly responsible for checking out customers and managing the money in the register.

-Sales Associate, Payless ShoeSource, September 2016-July 2018
Union, NJ

As a sales associate I was responsible for organizing the Floors Shoes to maximize space and call attention to the latest merchandise. Maintained cleanliness and organization of the store. Utilized strong interpersonal and communication skills to serve customers, and Sold, Returned, and exchanged merchandise while registering customers into Payless rewards.

EDUCATION AND TRAINING

Associate of Science
Architecture, Union County College, Cranford NJ May 2021

Union High School, Union MS 2017
